

Review 2018, Pushing Forward in 2019

THE INRESEARCH MEDICAL MONTHLY E-NEWSLETTER

2018 PROJECTS REVIEW

BY INRESEARCH MEDICAL TEAM

2018 was a year of collaboration and the objective of collaboration was achieved successfully. Over the past year, Inresearch Medical (Hong Kong) (IM) service covers Hong Kong, Macau, Singapore and Middle East area.

Looking back at 2018, we completed several research equipment installation projects, including the purchase of new equipment to the laboratory, and the replacement of the customer's old equipment.

We provided installation and guidance for our clients to have clearer understanding of operation and routine maintenance. And we assisted the clients to update of the SOP Operations Manual.

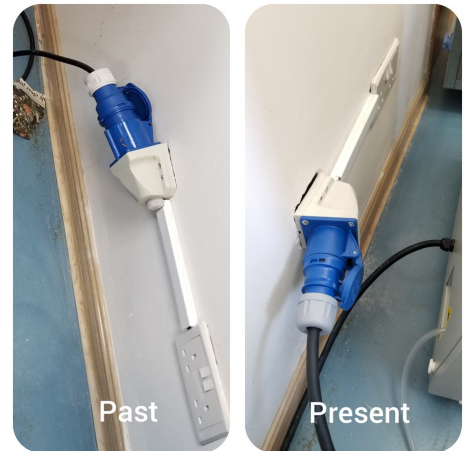

NEWS, UPDATES, HOT TOPICS

2018 PROJECTS REVIEW - 1
CUSTOMERS FEEDBACK - 2

The products we provided obtained international certification, CE, FDA, ISO 9001, ISO 13485, NSF etc. Our products provide a safety and efficient environment for laboratories, and "Pre-Analytical System" products preserved valuable samples in good quality for researchers.

Stepping forward into 2019, the macro and industry landscape will continue to evolve. With the development of technology, IM will further explore opportunities for collaboration and provide a wider range of services and products, creating values to our clients.

CUSTOMERS FEEDBACK

BY JENNIFER CHEUNG, CS MANAGER

According to customer's feedback, our products are more efficient than the clients old machines. After using our products, the time used for completing the same process is 40% less than before.

And the operation and routine maintenance are simpler than before, which improve their the operational efficiency and provide a more safe working environment.
